## How to make a rotating picture:

1. Open www.picasion.com, in your web browser.
2. Source your images and graphics from: your computer, your camera, a website or photosite (be careful of copyright though) such as picasaweb or flickr. Make sure they are all the right size and resolution fit them to your storyboard – Picasion will list them in order for you.
3. Set the **size** (for the wiki maximum between 200-250px wide, see advanced options), the **order**, **speed** and press 'Create'.

How to place the rotating picture in the wiki:

4. After pressing "Create", Copy the HTML code from the picasion website.

5. Go to the wiki, place the page you want to add the roting picture in edit mode.
6. Go to insert > HTML/Javascript

7. Copy the HTML code in the box. Then tick the box "Allow Javascript…" and then Next.

8. Then press " Insert Plugin".

When you **save** the page the picture will be visible.
